

FINAL INTERNSHIP REPORT

Project: Banking Information System

Internship: Core Java Winter Internship 2026

Name: P. Kavya Lakshmi

Certificate

This report is submitted as part of the Core Java Winter Internship.

Acknowledgement

I thank upSkill Campus, Uniconverge Technologies (P) Ltd., my mentors, faculty, and college for their continuous support.

Abstract

The Banking Information System is a Core Java application developed to perform user registration, login, deposits, withdrawals, fund transfers, balance enquiry, and account management using object-oriented programming.

Introduction

Banks require secure and reliable software to manage customer accounts and transactions. This project demonstrates such a system using Core Java.

Objectives

Develop a menu-driven banking application; apply OOP, exception handling, and file handling; strengthen Java programming skills.

Problem Statement

Manual banking operations are slow and error-prone. A software solution improves efficiency and accuracy.

Existing System

Manual record keeping requires more time, paperwork, and effort.

Proposed System

A Java application that supports secure banking operations with a simple menu interface.

System Requirements

Hardware: 4 GB RAM, Intel i3 or above. Software: JDK 17+, VS Code/Eclipse, Git.

Technologies Used

Core Java, OOP, Collections, File Handling, Exception Handling, Git & GitHub.

Modules

Registration, Login, Deposit, Withdrawal, Fund Transfer, Balance Enquiry, Account Statement, Search/Delete Account, File Management.

Implementation

The application uses classes, methods, objects, encapsulation, and validation to perform banking operations.

Testing

Functional testing was performed for registration, login, deposit, withdrawal, transfer, and account management.

Results

The project performs all core banking operations successfully in a console-based environment.

Advantages

Simple, secure, reusable, easy to maintain, and suitable for learning Core Java.

Limitations

Console-based interface and local file storage.

Future Enhancements

Database integration, GUI, online banking, mobile application, OTP authentication.

Learning Outcomes

Improved understanding of Java programming, OOP, debugging, file handling, and software development lifecycle.

Conclusion

The internship provided practical exposure to Java development and strengthened technical and problem-solving skills.
